

# Metallo d'Autore

Description	Metal-based micro-coating for INTERIORS
Substrates	All types of plasters, pre-painted walls, and concrete
Composition	<b>BASE:</b> aqueous dispersion in organic binder <b>METAL POWDER:</b> to be blended into the <b>BASE</b> just before application
<b>Technical Characteristics</b>	
Density	<b>BASE:</b> 1.01 ± 0.03 Kg/L
pH	8.5
Yield	1.4-1.6 m <sup>2</sup> /Kg in two coats
Drying	10 h at 20°C, RH 60%
<b>Application</b>	
Environmental Conditions	T. min 5°C, T. max 30°C, R.H. 60%
Tools	Stainless steel trowel
Dilution	Blend the <b>METAL</b> into the <b>BASE</b> (1:1)
Powder Types	Zinco, Stagno, Bronzo, Ottone
Precautions	Always apply under the conditions indicated. Check the condition of the substrate before starting and ensure that the surface is clean, dry, and uniform in absorption and appearance. Apply one coat of Fondo FDA Fine.

## APPLICATION OF METALLO D'AUTORE:

Mix the POWDER (of the chosen type) into the BASE by stirring carefully for at least 5 minutes, until completely blended. Apply a first coat of product evenly, but not too thickly, over the entire surface using a stainless steel trowel, and leave to dry for at least 4-5 hours. Apply a second coat of reconstituted product, again with a stainless steel trowel over the entire surface, but unevenly. After at least 24 hours, proceed to polish the applied surface using sandpaper of varying grits (preferably of silicon carbide); the recommended order of the grits used is: 320, 800, 1200, and lastly 2000 or 3000. Continue polishing until the desired effect is achieved.

### Packages:

Base: 1 Kg, 4 Kg

Metal Powder: 1 Kg, 4 Kg

**Storage:** Minimum temperature: 5°C

Maximum temperature: 30°C

### Stability:

3 years in the original containers

**Recommendations for disposal:** Code(s) of the European Waste Catalogue (Decision 2014/955/EU) 15 01 2. The EWC code given is only a general indication based on the product's original composition and envisaged use. It is the ultimate responsibility of the user to choose the most appropriate EWC code, based on the actual use of the product and on any alteration or contamination that may have occurred.
